

# Market Study: Solvents

**World Report (5<sup>th</sup> Edition)**

# This brochure provides further information on the study: “Solvents – World (5<sup>th</sup> Edition)”

## Executive Summary

Are solvents a solution to our waste problem? In any case, they can be used to recover raw materials that are as good as new, even from mixed or contaminated waste: Solvents allow targeted and clean removal of unwanted plastic types, labeling, and impurities. Chemical plastic recycling is an innovative application example for solvents. The potent chemicals can dissolve or dilute other substances without chemically altering them. Not only precision cleaning agents for printed circuit boards and microchips, but also nail polish remover and numerous other everyday products would hardly be possible without isopropyl alcohol, acetone, and more.

### Chemicals for a Colorful World

Solvents make paints and coatings processable and make it possible to control their properties in a targeted manner. With around 47% of total demand, companies in the paint industry are the largest consumers of solvents. The pharmaceutical industry is the second-largest application area, followed by the cosmetics, printing inks, and adhesives sectors. Large quantities of solvents are used, for example, for chemical manufacturing processes, degreasing, cleaning, cooling circuits, and de-icing. However, chemicals that can cause unpleasant odors, explosive vapors, health and environmental damage are increasingly controversial and subject to restrictions. The trend is therefore towards more environmentally friendly alternatives, such as bio-based solvents, particularly for products for end consumers and in the food industry.

### Alcohol as a Cleaning Agent

Alcohols are by far the most popular types of solvent: especially ethanol, n-butanol, isopropanol, and methanol. Ketones (primarily acetone), aromatics (such as toluene and xylene), esters (such as ethyl acetate and butyl acetate), and ethers (such as diethyl ether,

THF, or glycol ether) also have significant market shares. Ethanol will record the strongest growth: Ceresana's solvent market report forecasts an increase in consumption of 3.7% per year for this product. The market is growing particularly in the Africa and Asia-Pacific regions. This is followed by the regions Middle East and South America. The industry in Asia-Pacific currently consumes around 47% of all solvents worldwide – and around 3.5 million tonnes of alcohols alone per year.

### Current Solvent Market Analysis

**Chapter 1** provides a comprehensive analysis of the global market for solvents – including forecasts up to 2033: The development of **demand** (in tonnes) and **revenues** (in USD and EUR) is broken down for 7 regions and 6 applications. The demand for 14 different **product types** is also analyzed individually.

In **Chapter 2**, the market data for **16 countries** are analyzed in detail: **Demand** and **revenues** are examined for the most important national solvent markets worldwide. In addition, demand is split by the **application areas** paints & coatings, printing inks, adhesives, cosmetics & personal care, pharmaceuticals, and others. Furthermore, the demand for the following **product types** is shown: alcohols, ketones, esters, ethers, aromatics, non-aromatics, and others.

In addition to market data and forecasts, the solvent market report also contains **background information** on the general economic situation and the situation in the construction industry (as a downstream sector of the paints & coatings and adhesives application areas) in the individual countries.

**Chapter 3** provides **company profiles** of the **top 80 manufacturers**, such as ExxonMobil, Shell, TotalEnergies, Orlen, Equinor, Marathon Petroleum, Valero Energy, Idemitsu, and Sasol.

## Table of Contents (1/3)

### 1 Market Data: World and Regions

#### 1.1 World

##### 1.1.1 Demand

##### 1.1.2 Revenues

##### 1.1.3 Demand Split by Application

###### 1.1.3.1 Paints & Coatings

###### 1.1.3.2 Printing Inks

###### 1.1.3.3 Adhesives

###### 1.1.3.4 Cosmetics & Personal Care

###### 1.1.3.5 Pharmaceuticals

###### 1.1.3.6 Other Applications

##### 1.1.4 Revenues Split by Application

###### 1.1.4.1 Paints & Coatings

###### 1.1.4.2 Printing Inks

###### 1.1.4.3 Adhesives

###### 1.1.4.4 Cosmetics & Personal Care

###### 1.1.4.5 Pharmaceuticals

###### 1.1.4.6 Other Applications

##### 1.1.5 Demand Split by Product

###### 1.1.5.1 Alcohols: Ethanol

###### 1.1.5.2 Alcohols: n-Butanol

###### 1.1.5.3 Alcohols: Isopropanol

###### 1.1.5.4 Alcohols: Methanol

###### 1.1.5.5 Alcohols: Others

###### 1.1.5.6 Ketones: Acetone

###### 1.1.5.7 Ketones: MEK

###### 1.1.5.8 Ketones: Others

###### 1.1.5.9 Esters

###### 1.1.5.10 Ethers

###### 1.1.5.11 Aromatics: Toluene

###### 1.1.5.12 Aromatics: Others

###### 1.1.5.13 Non-Aromatics

###### 1.1.5.14 Other Solvents

#### 2.1.4 Spain

In 2023, the demand for solvents reached a volume of approx. X tonnes. According to our analysis, this value will increase by an average rate of X% p.a. over the coming years.

Spain generated revenues of approx. EUR X million with solvents in 2023. For the next 10 years, we are forecasting an increase in sales volume of around X% per year.

Table: Demand in Spain from 2021 to 2033 – split by product

In 2023, the largest application area for solvents in Spain was the "paints & coatings" segment. Around X tonnes were used in this application area. We forecast that the "pharmaceuticals" sub-market will account for the most dynamic development in the upcoming 10 years.

About three quarters of GDP is generated by services, and tourism in particular is booming. However, mass tourism in Barcelona and along the coasts is increasingly encountering resistance from the local population. The industrial sector accounts for around 22% of GDP, with the automotive sector alone accounting for around 8%. After real GDP growth of 2.7% in 2023, the IMF is forecasting an increase of 2.9% in 2024 and 2.1% in 2025 – well above the EU average. Export-oriented companies are mainly concentrated in Madrid and Catalonia, and to a lesser extent in the Basque Country. The rest of the country is characterized by less productive micro-enterprises (96% of companies have a maximum of nine employees). The unemployment rate (more than 11% in 2024) and youth unemployment in particular is the highest in Europe, ahead of Greece and Finland. The minimum wage was increased by 4.4% to EUR 39.47 per day

region in October 2024, the government organized more than EUR 14.4 billion in aid for reconstruction, e.g. in the form of loans. Spanish society is highly polarized; political conditions have been unstable, especially since the bursting of the real estate bubble and the financial crisis of 2008. A left-wing minority government under Pedro Sánchez has relied on separatists from Catalonia and the Basque Country since November 2023; it is based on a fragile coalition of six parties and two individual delegates.
With around 437,551 companies and almost 1.38 million employees, the entire construction industry generated around 12% of Spain's GDP in 2023: a production value of EUR 193.36 billion, an increase of 7.3% compared to 2022. The leading Spanish construction and infrastructure companies, which had grown domestically during the construction boom until the crash of 2007, now generate the largest proportion of their turnover abroad. Grupo ACS generated sales of EUR 41.63 billion in 2024 (not only with construction activities but also with e.g. toll roads), for example with the companies Dragados and Hochtief in Europe, Turner and Flatiron in North America, and CIMIC in Asia. ACS is currently ranked 10 <sup>th</sup> in ENR's "Top 250 Global Contractors". The largest Spanish construction companies by turnover also include Acciona S.A. (infrastructure turnover of EUR 8.15 billion), OHLA Group (construction turnover of EUR 3.3 billion), Grupo FCC (construction turnover of EUR 2.9 billion), and Grupo San José (construction turnover of EUR 1.4 billion). Ferrovial S.E., founded in 1952 as a Spanish railroad construction company, relocated its headquarters from Madrid to Amsterdam in 2023; Ferrovial's construction division alone achieved a turnover of EUR 7.2 billion in 2024.
In Spain itself, the construction industry was hit harder by the consequences of the COVID-19 pandemic than in other countries. It recovered more slowly than the Spanish economy as a whole: Total construction output in 2022 was almost 25% lower than in 2019. According to Eurostat figures, labor productivity in the Spanish construction sector has fallen by 18% since 2015 – compared to an average of just 5% in the eurozone.

### 1.2 Western Europe

- 1.2.1 Demand
- 1.2.2 Revenues
- 1.2.3 Applications & Products

### 1.3 Eastern Europe

- 1.3.1 Demand
- 1.3.2 Revenues
- 1.3.3 Applications & Products

### 1.4 North America

- 1.4.1 Demand
- 1.4.2 Revenues

## Ceresana – Your Partner in Market Research

As one of the world's leading institutes for market research, we have been specializing in the areas of mobility, chemicals, plastics, packaging, industrial goods, and bio-economy for the past 22 years.

10,000 customers have already benefited from our analyses and forecasts. You too can choose from our wide range of market studies to gain the knowledge base for your company's success!

## Our market studies provide you with the knowledge to...

- ... further develop your business
- ... gain competitive advantages
- ... assess investments and innovations
- ... identify new business partners, target groups, and markets
- ... anticipate risks and opportunities
- ... forecast supply and demand
- ... analyze value chains
- ... determine future trends and technologies

**In short: strengthen your company.**

## Among the 10,000 customers who already trust us are:

**Thank you for your trust!**

## Who benefits in particular:

- Producers, processors, traders, suppliers, as well as engineering companies
- Associations, institutes, consultants, banks, investors, founders, freelancers, entrepreneurs, and service providers
- Executive boards, finance, business development, strategic planning, market research, marketing, sales, distribution, R&D, and procurement

**Please do not hesitate to contact  
us if you have any questions.**

## Reliable Data and Facts for Your Knowledge Advantage:

- Revenues, demand, production, import, and export until 2033
- Macroeconomic and sector-specific explanations per country
- Segmentation into applications, technologies, and products
- 7 world regions and up to 40 countries
- Profiles from manufacturers with capacities
