SWEDISH ETHANOL CHEMISTRY

Sekab

BIO-BASED
ETHANOL

ETHYL ACETATE

ACETALDEHYDE

ACETIC ACID

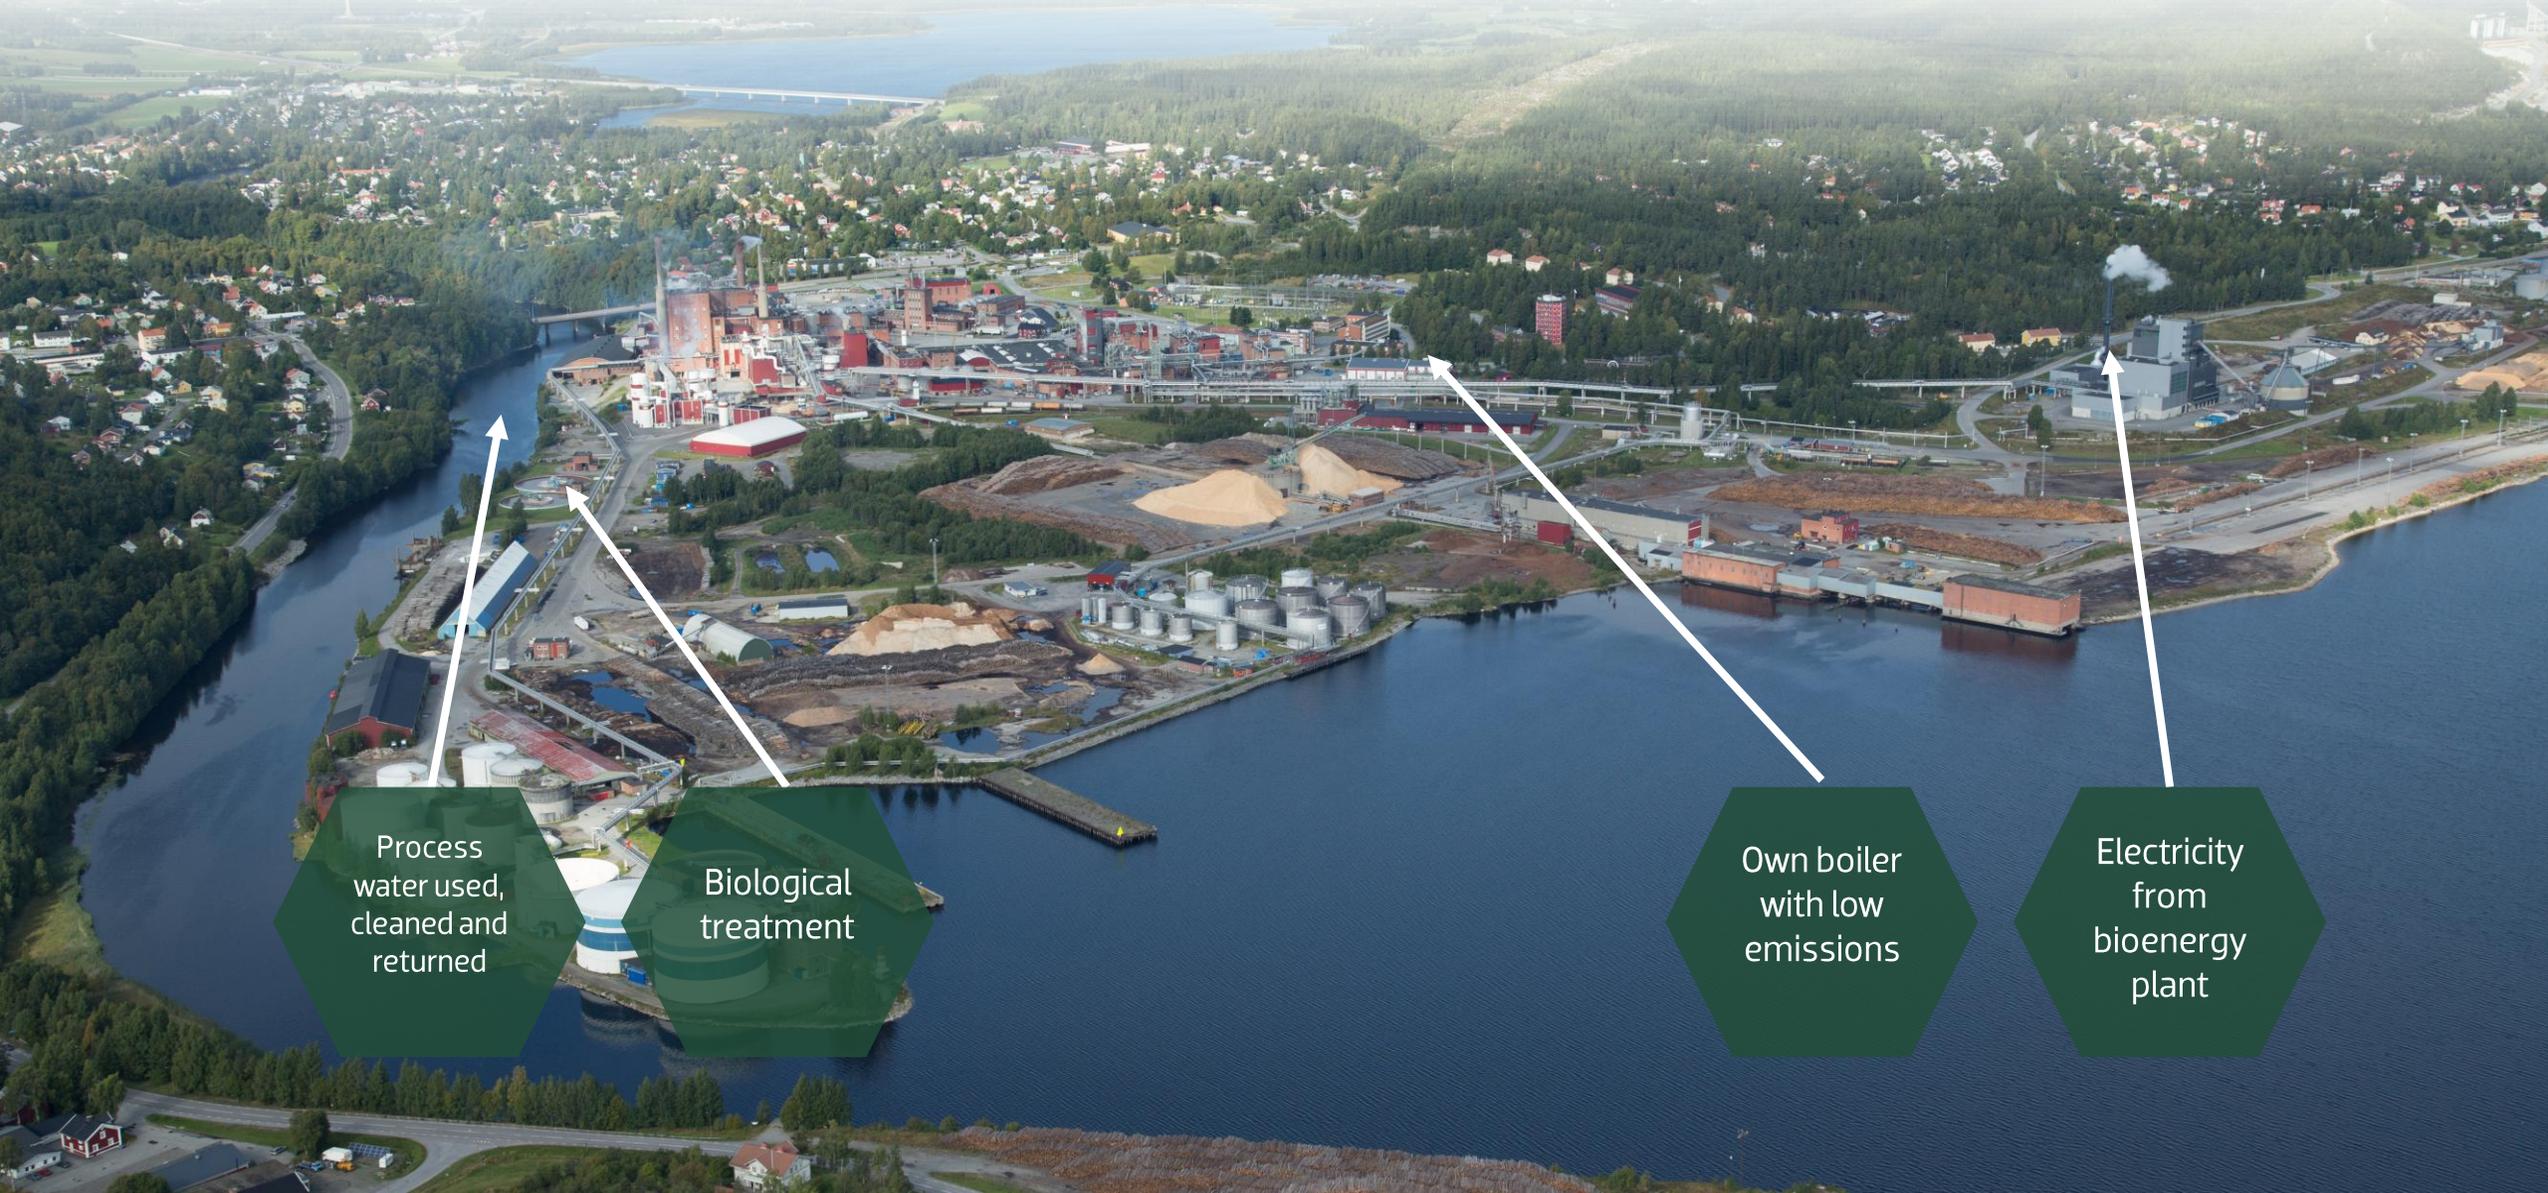

Sekab

Raw material:
100 percent bio-based ethanol

Sekab

Circular production with green energy

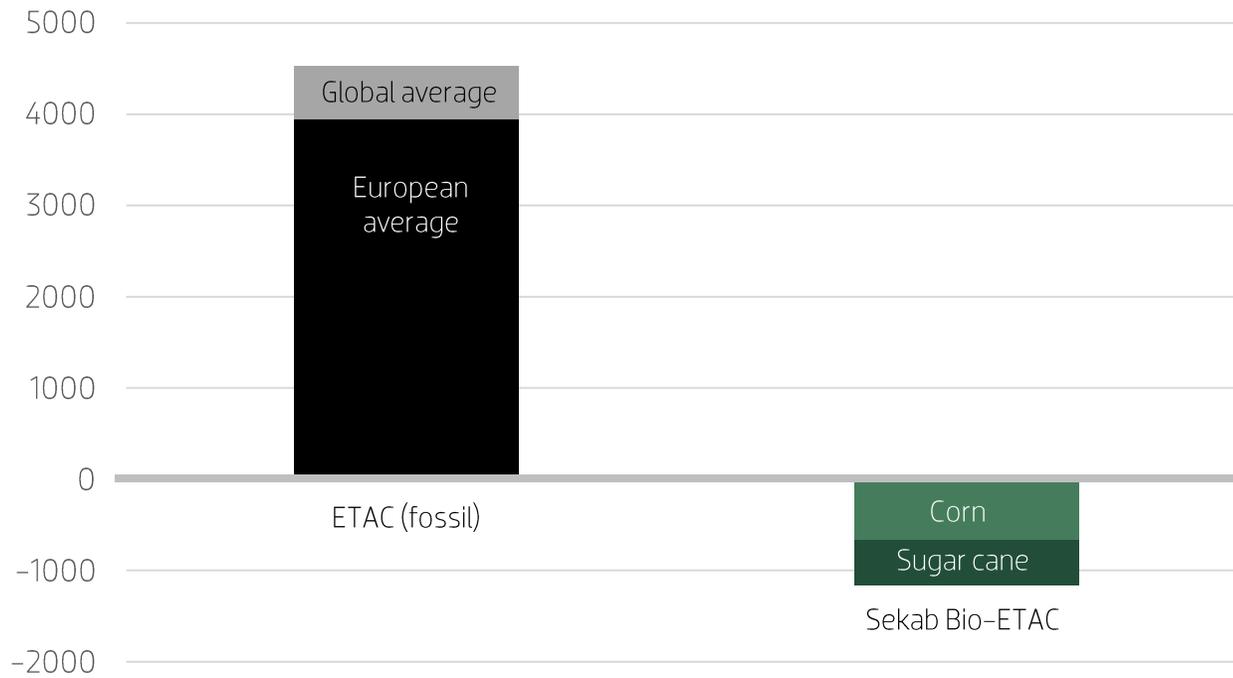

Process water used, cleaned and returned

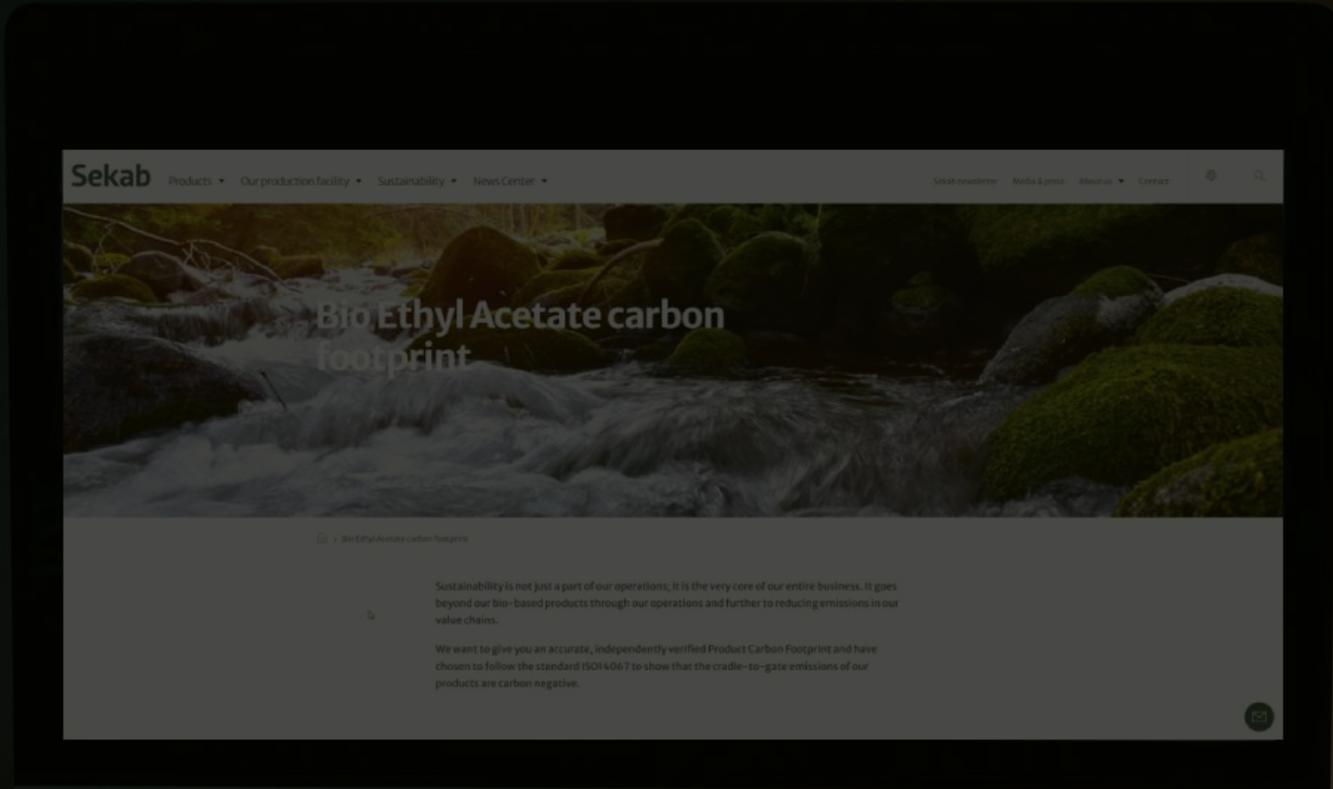

Biological treatment

Own boiler with low emissions

Electricity from bioenergy plant

Carbon negative at our gate

Transparency is the new green....

Bio Ethyl Acetate carbon footprint

🏠 > Bio Ethyl Acetate carbon footprint

Sustainability is not just a part of our operations; it is the very core of our entire business. It goes beyond our bio-based products through our operations and further to reducing emissions in our value chains.

We want to give you an accurate, independently verified Product Carbon Footprint and have chosen to follow the standard ISO14067 to show that the cradle-to-gate emissions of our products are carbon negative.

You might actually save money
